## Acryled For Wall Mounting

Ultra slim and clear Acryled. The edge-lit acryled mounts portrait or landscape for various types of signage. Edge-lit Acryled lights up posters in various sizes. Acryled lit with LEDs uses less power than traditional illuminated signage. Poster is placed between the specially treated acrylic & cover acrylic sheet. Fixed into position by two clear clips on two short sides. Compared to traditional articles in the market, Acryled provides easier poster change while the unit stays mounted on the wall.

## Modular Alphabet with LED

The sockets to be used to connect the letters are specially designed with silver plated brass. Therefore, it is resistant to corrosion. The most important feature of modular letters is the LEDs' high lumen output with their 90,000 hrs lifetime. Injection molded letters are UV filtered and their color will not fade away in case of direct sunlight exposure. Their printed circuit boards are double sided and epoxide. The modular letters are impact modified and a riveting method is used to prevent copper strips from being broken off. Products are for indoor use.

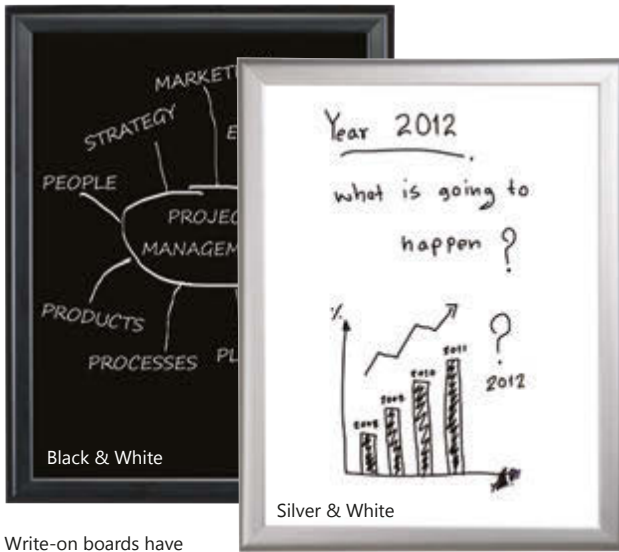

UL/Pat. test approved.
