

PRODUCT REVISION ANNOUNCEMENT

RELEASE DATE: 22/12/2014 - Document #1114-PRACM

This announcement contains revision of (1) product, **Classical Menuboards** in Menuboards Index of MT Displays 2014 Catalogue.

Dear MT Displays Partners, Distributors and Other Interested Partners,

Effective from today, MT Displays launches the revision on Classical Menuboard Rev2. Through this specification development process, MT Displays will provide both increased product efficiency and stability. As a key partner, MT Displays invites you to participate in following below information.

The tentative MT Displays improvement revision schedule includes the following Milestones:	Dates
Release specification announcement letter	Week 3, 2015
Coordinate with distributors for pending orders	Ongoing
Release new technical specifications	Week 4, 2015

Steps of Revision:

MT Displays keeps the same design of Classical Menuboard. Due to expansion in use in different conditions, there has been a need to increase the base of Classical Menuboard. MT Displays tested, reviewed, analysed the efficiency performance data and reorganized production process for Classical Menuboard bases. As a result, MT Displays decided to revise the base to more heavier base.

BOM Changes

There has been no change in the overall view of Classical Menuboard. In order to increase the stability of menuboard, the weight of base has been increased, consequently the whole product weight has increased.

Distributor Participation:

M&T plans to track changes and implements changes automatically as the change has been approved by technicians and designers; M&T incorporates it into a new revision of your BOM instantly. For your internal information, please communicate with your purchasing team and your sales team for introducing this new status of higher stability. For all your pending orders, the improved design will be applied automatically and used continuously as of week 5, 2015.
