

CITY SIGN

DURABLE, PORTABLE MULTI - PURPOSE SIGNS WITH A STABLE DESIGN

The City Sign is a stable, heavy-duty, and highly durable vertical sign solution specifically designed for environments where space is limited. It is not only ideal for traffic control but also they are perfect for areas such as parking lots, playgrounds, shop entrances, or busy sidewalks. Their compact design ensures they fit seamlessly in tight spaces, while still providing clear, visible messaging in both pedestrian and vehicular zones. It can be used as a traffic sign to keep pedestrians and workers safe on the streets or inside a mall to direct people efficiently along certain routes. Built with a robust PVC base and a main body of weather-resistant HDPE (high-density polyethylene), this sign is engineered for long-term outdoor use, making it particularly effective in outdoor conditions. It features a double-sided display area, allowing for the direct application of self-adhesive vinyl posters on both surfaces. The unit includes an oversized molded-in handle to ensure effortless transport and repositioning. The sign is offered in black as the standard color.

KEY SELECTION ATTRIBUTES

- Double-sided vertical traffic signs with a space-saving design, ideal for narrow areas.
- Suitable for parking lots, playgrounds, shop entrances, busy pavements, and windy locations.
- Weather-resistant HDPE body and recycled PVC base.
- Two-part structure: HDPE main body with double-sided self-adhesive poster area and molded-in handle; plus a heavy recycled PVC base for stability. Base slides down from the top of the body; bottom panel fits a single or double-stack base.
- One-size recycled PVC base: 4 kg or 4 + 4 kg double-stack. Fits the same panel and slides on easily.
- Oversized molded-in handle; can be carried with base attached.
- Durable HDPE and PVC construction: no rust, no splintering, no discoloration, zero maintenance.
- Compatible with 203 x 914 mm self-adhesive posters on both sides.
- Holds 2 signs per stand; suitable for temporary or permanent vinyl posters.
- Posters are not included in the original product package.
- Recessed sign surface minimizes damage; reinforced side walls and heavy flange prevent overturning.
- Prepare surfaces for vinyl application; hook-and-loop fasteners recommended.
- Standard color: Black RAL 9005. Other RAL colors on request.
- Stackable with or without the base.
- Ships unassembled with easy instructions; tool-free assembly.
- Various packaging and bulk options available.

PHYSICAL DATA

Material

Durable plastic - HDPE (high-density polyethylene) board body and recycled PVC base.

Poster Material & Thickness

Suitable for self-adhesive posters to stick-on.

Surface Finish

Standard in Black RAL 9005 color and various RAL colors available upon request. Call for custom color requests.

Recycled Content

Up to 40% recycled content for main body and 95% recycled content for the base used.

Warranty

All products are guaranteed for 3 years by MT Displays with below conditions:

[Warranty Conditions](#)

Hazardous Substances

M&T Displays prioritizes compliance with the REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) and RoHS (Restriction of Hazardous Substances) directives to protect both the environment and human health. We ensure that our products do not contain substances listed under REACH and adhere to strict RoHS limits for hazardous materials. Our manufacturing process ensures that lead, mercury, cadmium, and other restricted substances remain within the permitted thresholds, guaranteeing safe and sustainable products for our customers.

Design Considerations

Double-sided vertical traffic signs featuring a space-saving design, perfect for narrow spaces. Great to set aside in parking areas, play grounds, shop entrances and busy pavement roads; especially for windy areas. Weather-resistant: Suitable for rainy outdoor conditions with HDPE (high-density polyethylene) body and PVC base. Suitable for use with 203 x 914 mm self-adhesive posters, applied directly to both sides. Recessed sign surface that helps reduce damage to signs. One-size recycled PVC base, usable as a 4 kg or 4 + 4 kg double-stack. Fits the same sign panel, slides down from the top easily, and the dual configuration makes it space-saving. Sold separately. Designed with an oversized molded-in handle and a comfort grip, and can be picked up with the base attached. Easy to move and store. Made of durable plastic and PVC for long-lasting performance — no rusting, no splintering, no discoloration, and no maintenance required. Side wall design for added strength; large, heavy flange for stability and to prevent overturning.

Cleaning and Disinfecting

Clean your displays, with damp microfiber clothes, rinsed with simply water or warm, soapy or gentle shampooed water. Avoid using vinegar, abrasive, acidic, alcohol-based or heavy cleaners or cleaners containing Ammonia. Only after cleaning the product, if needed, simply apply disinfectant or sanitizer that is in compliance with your local guidelines and regulations.

Installation Considerations

The City Sign is designed for fast, tool-free assembly and ships unassembled, accompanied by clear mounting instructions. Each complete system consists of two primary components: a durable, high-density polyethylene (HDPE) main body—featuring the double-sided poster area and an oversized molded-in handle—and a heavy, recycled PVC base that provides exceptional stability. Assembly is straightforward: the base simply slides down from the top of the main body panel until fully secured. The bottom of the panel is engineered to accommodate either a single base or a double stack of bases for enhanced stability. The double-sided display area supports two poster applications and is suitable for both temporary and permanent self-adhesive vinyl graphics. The surface is prepared for direct application; however, we recommend cleaning the panel surface with a damp cloth and allowing it to dry completely before applying any adhesive stickers to ensure optimal adhesion. Signs can also be secured using hook-and-loop fasteners. Offered with or without professionally applied posters, the City Sign is stackable for efficient storage (with or without the base attached), and various packing configurations and bulk order options are available. Please refer to our product articles for detailed ordering information.

Storage Conditions

Goods should be stored at 0° C to 25° C in a dry place. Store in the original package.

INSTALLATION INSTRUCTIONS

City Sign

A. Part is the HDPE main body

B. Part is the heavy PVC base

Caution: Handle the heavy PVC base carefully when attaching the body and top part. Slide the base down carefully from the top of the main body panel. The bottom of the main body panel accommodates either a single base or a double-stack base.
